## Fimbel Doors are engineered for *SERVICE*

### PROCESS:

- Each door is crafted with care and uniquely engineered and manufactured to our strict specifications
- Precise details are controlled through proven and sustainable state-of-the-art systems built on quality to ensure repeatability and longevity for both our clients and the environment

### PRODUCT:

- Exceptional warranty – we stand behind our product
- Engineered and crafted for longevity, durability and beauty
- Premium features and custom options available for design, finish, application and beyond

### COMMUNITY:

- Our "family" extends to our team, partners, community and customers; we are who we are today because of them
- We take pride in partnering with local businesses and supporting community first responders and are proud to supply our overhead doors to 99% of the New York City Fire Department

# *Delivering More* in Our Commercial Doors

Whether you find inspiration in nature, the neighborhood or the newest concept, our goal is to build solutions to bring your vision to life while offering beauty and durability you can count on. For more inspiration, visit us at: **www.fimbelads.com**

# Door Case Studies | *Some of Our Favorite Projects*

DOOR CASE STUDY 1:

## Whitehouse Fire & Rescue Whitehouse Station, NJ

Product: **Steel ISO with AC-50 Glass Section**

Nestled in our backyard is this incredible Fire and EMS station serving our community and our company. Using white Steel ISO sections and an AC-50 section for the windows, this firehouse with its varied sized openings was able to accommodate each one with uniformity. We are very proud to provide safe passage to their life-saving efforts!

DOOR CASE STUDY 2:

## Historic Engine 55, Fire Dept. of New York, NY

Product: **Custom Presidential with Carved Faux Wrought Iron Designs**

Engine 55's beautiful three-story firehouse, built in 1889, was designed by R.H. Robertson. The original doors were wooden swing-out carriage doors – intricately made and adorned with wrought iron. To match the original spec, as required by landmarks, a combination of innovative technology, advanced materials, craftsmanship and artistry was required.

DOOR CASE STUDY 3:

## Historic Engine 51 Fire Dept. of New York, NY

Product: **Steel ISO Flush Door with Custom After Factory Finish**

Very few images conjure a feeling of pride like the American Flag. Located in Staten Island, NY, this firehouse applied a custom after factory finish to our Steel ISO-DOR to share their pride with their neighbors. Offered in both red and white, this product allows your independence to shine!

To bring your dreams to life, reach out to our team at **sales@fimbelads.com**.

# YOU DREAM IT. WE BUILD IT!

DOOR CASE STUDY 4:

## Town of Coventry Fire & EMS Coventry, CT

Product: **Roaring Twenties**

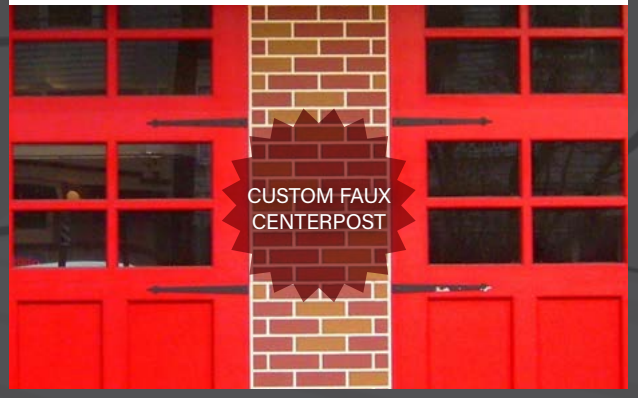
Wanting to combine their town buildings with Fire and EMS in order to share resources and open community opportunities, this project required modernizations that honored the quaint and longstanding history of the area. Adding small, decorative windows allows visibility from inside while the doors are closed. Custom tops complete the project!

DOOR CASE STUDY 5:

## Independence Engine and Hose Fire Co. 1 South Amboy, NJ

Product: **Factory Finished Roaring Twenties with Faux Centerpost**

Fire trucks have come a long way over the years, but Historic preservation requires architecture to remain the same. Using innovation and artistry, this SINGLE door has a faux centerpost replicating the original structure while accommodating the Engines of today!



DOOR CASE STUDY 6:

## Central Fire Station Portsmouth, NH

Product: **Roaring Twenties with Factory Finish**

Our innovation and sustainability make it possible to keep the past alive as seen in this historic, downtown Portsmouth firehouse. "Throughout our history, we have taken pride in balancing tradition with innovation, and demonstrating a strong commitment in celebrating the past while at the same time looking to the future."
*-Todd Germaine, Fire Chief*
